**Cascadero Copper Corporation Announces Termination
of Amended Transaction with InCoR Holdings Limited**

North Vancouver, BC, May 24, 2019 - Cascadero Copper Corporation (TSXV: CCD; the “**Company**”) announces the termination of the renegotiated term sheet with InCoR Holdings Limited that was previously announced on April 5, 2019. The term sheet was terminated due to certain issues that could not be resolved between the parties.

Brian Causey, the Company’s Chairman, stated, “The Company is disappointed that the transaction with InCoR did not proceed. The Company will continue to seek alternate sources of funding to explore and manage the geological potential of the Company’s property portfolio in northwestern Argentina that has required 10 years to assemble. The portfolio is precious metals focused, and consists of 32 mineral tenements covering 61,413 gross hectares and 57,256 net hectares. The Company believes that the properties are potentially prospective for copper, lead, zinc, gold and silver, and, at Taron, cesium. The properties are mainly in Salta Province, which is a drastically under-explored area in Argentina.”

Brian Causey

Chairman
